

## **Green.Building.Solutions. Summer University 2020** **Information: Scholarship Funding**

Thank you for your interest in financially funding the Green.Building.Solutions. 2020, organized by the non-for-profit OeAD-Housing Office and the intention to support a future change maker in the field of architecture, planning and building. The funding of scholarships enables highly qualified student with financial needs to participate in the Green.Building.Solutions. Summer University and consequently increases accessibility to the summer school. This is important to broaden perspectives and to implement sustainability in other countries by the multiplication of knowledge gained in Austria.

As a sponsor, you have the opportunity to participate in the selection of the applicants, respectively you can choose the student, who you would like to fund (e.g. according to your company's interest).

In addition to that, all of our national and international sponsors are cordially invited to attend the public opening and the closing ceremony in Vienna, where you can get to know "your" scholarship receiver personally. Also all the sponsors are mentioned in front of the audience and shown on screen during the opening speech.

Furthermore, the logo of your company will be integrated in the final reports and we will publish your logo and a text about your company on our website, as you can see [here](#).

You can communicate the financial support and the collaboration to your business partners and customers. For that, we will provide you with texts, information, articles, press releases and pictures during the year. After the 3-week event reports and professional pictures are made available for individual use.

Net price for a scholarship is 2,000 Euros.
